

## creations euclid collection

### COMPONENT SPOTLIGHT

Featured at left is this collection's tube connector. The connector slips inside the tubing and then swivels to match any angle between 90° to 180°. The ability to create angles makes this collection very useful for corner installations or bay windows. Supplied o-rings help the union between tube and connector to stay tight. Item is shown in a brushed brass finish – antique brass, brushed nickel, polished brass and polished chrome are also available.

part no. 129229

Vesta's Creations Euclid collection showcases pure geometric forms that have been masterfully machined by one of Europe's top manufacturers. Available in five popular finishes, this product group is the perfect finishing touch to any contemporary or modern space utilizing lightweight fabrics.

### COLLECTION NOTES:

Vesta recommends additional brackets every 3-4 feet with this collection to properly support the weight of your treatment. For the purpose of quoting, we loosely figure 4 rings per foot - your drapery workroom can provide a more accurate quantity. Tube lengths exceeding 120" will incur significant additional freight charges. Collection's tube connector may be used to create angled or corner installations.

### ABBREVIATION KEY:

**D** = diameter  
**H** = height  
**L** = length
