

imperial rome collection

COMPONENT SPOTLIGHT

This collection uses finials that insert into tubing (see slanted lines below). Installers should use liquid nails, Loc-Tite or some other adhesive product to secure finials to the tubing. Caution: once both products are joined in this manner, their union is permanent. All finials in this collection EXCEPT Augustus attach in this way. Augustus ships with an attachment adapter.

Vesta's Imperial Rome collection features 2" diameter brass for those instances where a treatment requires more strength. The showcase of traditional and contemporary finial designs are available in six popular finishes, including, new for this year, old black. The collection's finial adapter makes it possible to use finials from our Crystal Magic line to broaden the overall appeal and functionality of this product group.

COLLECTION NOTES:

Vesta recommends additional brackets every 6-8 feet with this collection to properly support the weight of your treatment. For the purpose of quoting, we loosely figure 4 rings per foot - your drapery workroom can provide a more accurate quantity. Tube lengths exceeding 120" will incur significant additional freight charges. The collection's tube splice can be used to achieve longer spans - the required center bracket will help conceal the resulting seam.

ABBREVIATION KEY:

D = diameter
H = height
L = length
P = projection
W = width
ID = inside diameter
