

Vesta's Stairways to Elegance collection adds the finishing decorative touch to your stair runner treatment. This elegant home accent is available in several finishes and stocked for immediate shipping.

**COLLECTION NOTES:**

To determine the proper tube length for your stair rods, measure the width of your runner and then add 2 inches. That measurement should create enough clearance for properly mounting the collection's brackets. Stair rods are strictly decorative and do not affix the runner to the stairs.

**ABBREVIATION KEY:**

**D** = diameter  
**H** = height  
**L** = length  
**P** = projection  
**W** = width  
**ID** = inside diameter

## stairways to elegance

**COMPONENT SPOTLIGHT**

Illustrated at left is how this collection's finials affix to available stair brackets. Typical finial installations involve the finial attaching to tubing by means of a set screw, but in the case of stair brackets the finial actually is tightened to the bracket creating the illusion that tube and finial are connected.

1. crown finial  
part no. 801704
2. classic bracket  
part no. 802100
