

CONTROL BY THE NUMBERS

Hunter Douglas window fashions offer five distinct privacy/light control levels (below).

- 1** Allows light to enter while reducing glare. Softly focuses view to outside.
- 2** Diffuses light for soft, screened view. Moderate privacy.
- 3** Transmits filtered light with no view through covering. Provides more privacy.
- 4** Filters more light. Blocks view. Provides even more privacy.
- 5** Blocks virtually all light. Provides the most privacy and light control.

All standard fabrics except Sheer Linen			•		
All EveScape™ fabrics					•

* Does not include perforated slats which are designed to allow light to filter through.

† A groover insertable fabric combined with a groover blocks virtually all light.

‡ Except Luster™ products with a privacy and light control rating of 4.

x Vanes/slats open.

xx Vanes/slats closed.

Note: The addition of the PowerRise® or PowerGlide® battery operated remote control system to products does not alter the level of light control and privacy.

N/A Test results not available at this time.
