Tudor

FINIALS

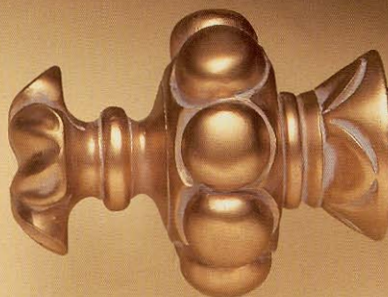

Our beautiful finials are original pieces of art. First hand sketched in intricate detail on paper, each finial is brought to three-dimensional life by a skilled artisan who carves it in clay. From the original carving, a mold is made from which a limited number of finials can be cast. Finished to perfection, they are the crowning glory to elegant windows.

BRACKETS

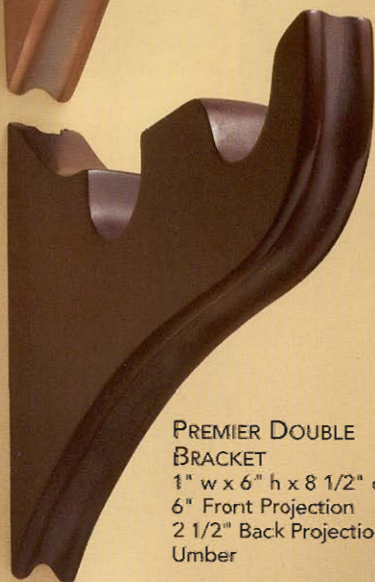

Our versatile brackets are designed to coordinate beautifully with the finials and poles, featuring a "key lock" installation plate to provide optimum strength and support for drapery treatments. Remember, it is always best to install your brackets into wall studs. Heavy treatments may require different screws and mollies than those included with our brackets.

LUXE TOUCHES

Before the 20th century, richly-carved architectural elements were only found in the homes of royalty and the extremely wealthy. Today, skilled artisans at Paris Texas Hardware incorporate regal hand-carved details in our distinctive drapery hardware collections — lending a welcome sense of history to every window, every room, every modern-day interior.

RINGS

The artful drape of a window dressing is often determined by the rings which suspend it. While they are utilitarian, our resin and wood rings also provide a sophisticated finishing touch. Available in a variety of classic patterns and refined finishes, they visually connect the drapery pole and fabric — proving that absolutely no detail escapes our attention when it comes to creating beautiful windows.

HOLDBACKS

Ornately carved round and square medallions attached to four-inch stems are a glamorous accent for any window. Gilded in a regal metallic or lustrous furniture-inspired wood finish, they can be used to create casual or opulent swags. Mounted above a window, they are a dramatic way to suspend tab-top window treatments. And in a bathroom, they are an elegant way to hang towels or plush robes.

AVAILABILITY

Please allow 10 business days to produce items in the Regal Reflections collection.

EXCLUSIVE REGAL REFLECTIONS FINISHES

New! – Three furniture-inspired looks - Tudor, Branchwood and Java.

Returning Favorites – Antique Gold, Old Brick, Dusty Antique Gold, Antique Gold Leaf, Antique Gold with Mahogany, Mahogany, Umber, Ivory, and Dusty Antique Gold with Mahogany.

Regal Reflections collection items are only available in the above finishes.

Finishes with antiquing, dusting or glazing will vary from product to product depending on the level of detail. Areas with deeper recesses will appear darker than smooth areas.

For the best possible finish match, refer to the Paris Texas Hardware sample chips. These will enable you to see the beautiful shadings and highlights that make our finishes so special.

MATERIALS

Finials, brackets, holdbacks and some rings are made of resin composite material. Resin may be damaged by cutting, drilling or attempting to alter size or shape of product. Poles and some rings are made of various hardwoods.

FLUTED WOOD POLES

Fluted poles are available in 1 3/8" and 2 1/4" diameters in 2', 4', 6' and 8' lengths. 12' lengths are available in 2 1/4" diameter poles only. Custom lengths are available upon request at no additional charge.

Poles may be spliced together using a double-sided splicing screw, which is included with each pole. We recommend a center support bracket for pole lengths in excess of six feet. We cannot guarantee against sagging caused by unsupported spans over six feet.

FINIALS

Resin composite finials are sold as pairs and are specified to fit 1 3/8" or 2 1/4" diameter fluted wood poles. Each finial base has a 1/4" recess for a clean pole fit. A 1 3/8" wood dowel screw is permanently set into the base of each finial. This screw may not be removed or replaced without damaging the finial.

BRACKETS

Brackets are sold individually and are specified to fit 1 3/8" or 2 1/4" diameter fluted wood poles. The 6" projection double bracket is designed to hold a 1 3/8" diameter pole in the back cradle.

Brackets are designed with a separate "key lock" installation plate. Installation hardware and instructions are included. Some heavy treatments may require stronger fasteners (mollies and screws) than those included with the brackets. Brackets should be installed securely into wall studs.

We recommend a center support bracket for pole lengths in excess of six feet. Poles without the proper support may sag over time.

HOLDBACKS

Holdbacks are sold as pairs and are made of resin composite material. Holdback stems are 4" long and are attached to the faceplate with a screw and to the wall with a round metal mounting plate and two screws.

Holdbacks may also be used as window medallions. 2" projection stems are available for an additional charge.

RINGS

Rings are sold individually. Lyon and Leaf rings are made of resin composite material and the eyelets are not detachable. The plain rings are made of wood and have detachable eyelets.

Excessive movement of rings on the top of the pole will naturally abrade the finish.

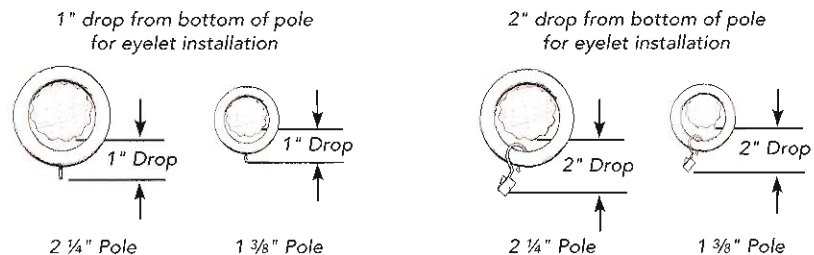

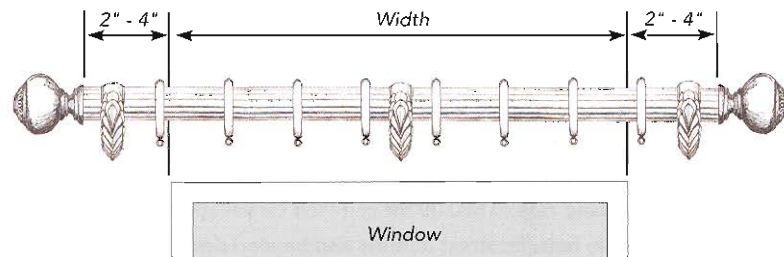

We recommend three to four rings per foot of cut pole length or six to seven rings per width of fabric.

Traverse Systems are available in Regal Reflections.

HOW TO MEASURE

- 1) Measure the window width from outside the casing edges. We recommend at least 2" to 4" per side for bracket placement, or finding wall studs on each side of the window in which to drill. Installing the brackets into wall studs is the safest and most secure installation. Refer to window illustration below.
- 2) If a window is in the corner make sure there is enough room to accommodate the finial.
- 3) Height of bracket placement is determined by the finished drapery length and style. If the treatment is designed to be used with rings, be sure there is proper allowance for the drop of the ring. Refer to the ring illustrations below.

ORDERING TIPS

- Include item number and finish code.
- Custom cut pole lengths are available for no extra charge.
- For custom pole cuts, note pole length to the nearest 1/4".
- Treatments that require a span over 8' may be achieved by splicing two poles together.
 - Splicing screws are included with each pole ordered.
- A center support bracket is recommended for pole lengths in excess of six feet. Poles without proper support may sag over time.
- 3-4 rings per foot of finished pole length or 6-7 rings per width of fabric are recommended as a rule of thumb.
- Heavy draperies (weighing over 3 pounds per foot) should be installed using drapery pins instead of clips.
- We recommend using a professional installer. The fasteners (screws and mollies) included may not be properly suited for the wall material. Paris Texas Hardware will not assume responsibility for improperly mounted hardware.
